			All lifts cannot be from the same group. Lifts must have different abbreviations..		Lifting arm begins to bend (excluding while changing hold/position) <u>Two Group 3 are executed</u>		
<b>TWIST</b> Max 1	Lz, F, T or A take-off is accepted		Missing rotation of ½ revolution or more		Downgraded Twist	3Li (B-4) 3Li (B-4)*	
<b>THROW</b> Max 2	Must be different Throws	FTh and LzTh are considered the same	Both a Flip and a Lutz throw are included		Second throw receives no value	3FTh 3LzTh*	
<b>SOLO JUMP</b> Max 2	1 solo jump						
	1 jump combo or sequence	2A or triple jumps may not be repeated in separate solo jumps	Repeated solo jump		If in a jump combo, only the repeated jump will not be counted	3S 3S*+2T+2Lo+C	
		<u>Jump combo may contain no more than 3 jumps</u>	<u>Jump executed with a 4<sup>th</sup> jump</u>		<u>The last jump will have no value</u>	3T+2T+1T+2Lo*+C	
			Jump sequence is executed other than a direct step in between the first jump and an axel type jump		Jump(s) after the first is invalidated	2Lz+S+1A*	
<b>PAIR SPIN COMBO</b> Max 1	PCoSp must consist of at least 1 change of foot and at least one change of different basic position by both	PSP not allowed	1 or both partners perform a PSp		Element invalidated	PSp (B-4)*	Minimum 8 revs <b>Penalty:</b> GOE reduction for "Less than required revs"
			1 or both partners do not have at least 1 change of foot and at least 2 revs in 2 different basic positions		No value	PCoSp (0)	
			Short stop, except when changing directions		Spin is concluded		
			1 or both has only 2 basic positions (with at least 2 revs in each)		Base value is reduced and indicated with "V"	PCoSp (B-4)V	
<b>DEATH SPIRAL</b> Max 1	Must be different from SP: <u>(no BoDs)</u>		BoDs is performed		Element invalidated	BoDs (B-4)*	
			Woman never <b>reaches</b> her low position.		No value		
			Man's knees not clearly bent for 1 rev		No value		
			Man's holding arm not extended for 1 rev		No value		
			Woman loses edge & goes to boot or knee		Element is concluded		
			Man changes pivot position		Element is concluded		
Man's anchored pivot re-positions or blade touches the ice		Element is concluded					
<b>CHOREO SEQ</b>	Must be clearly visible		Not clearly visible		No value		

**SPIRAL SEQUENCE**

**Definition of a Spiral Sequence:** A collection of at least two spirals on different feet with at least one spiral in an unsupported position. The spirals may be connected by any number of steps, turns, hops or other comparable moves. The first two performed spirals shall be identified as the required spirals for the sequence. Additional spirals, if included, will be considered for GOE only. The spirals must not be separated by other elements such as jumps or spins.

**Definition of a Spiral:** A gliding position executed on one foot with free leg extended (including knee and foot) above hip level. Variations such as Biellmann, “Y” type, other similar types of positions with the free leg extended to the side or behind, and changes of free leg position while maintaining the spiral position (i.e. moving free leg from front to side, etc.) are permitted within the spiral position. Such variations or changes of positions are not considered to be different spirals for the purpose of identifying a spiral for the spiral sequence.

- A spiral sequence meeting the definition will be identified as “Basic Level”.
- The element will be identified as “No Level” in the following situations:
  - There is not a sustained spiral position (i.e. not kicked) on each foot
  - There is not a spiral on each foot
  - There is not at least one spiral with an unsupported position
- If either spiral is so short that the edge is not well-established, the edge is flat, or the position is not held long enough to be evaluated, the judges will apply the corresponding GOE reduction(s) as appropriate.
- In the case of a pair team, both partners must perform spirals meeting the spiral sequence definition.

<b>Guidelines for establishing +GOE: SpSq</b>
<b>For +1: 1 bullets / For +2: 2 bullets / For +3: 3bullets For +4: 4 bullets / For +5: 5 or more bullets</b>
<b>➤ For +4 and +5 THE FIRST THREE bullets highlighted in bold must be present</b>
<ol style="list-style-type: none"> <li><b>1. Good body line and full extension in both spirals for 3 or more seconds each</b></li> <li><b>2. Effortless throughout with good energy, flow and execution</b></li> <li><b>3. Element matches the music</b></li> <li>4. Good ice coverage</li> <li>5. Good clarity and precision - attain positions quickly and effortlessly</li> <li>6. Creativity and originality</li> <li>7. Good unison (Pairs only)</li> </ol>

<b>Guidelines for establishing GOE reductions for errors: SpSq</b>	
Fall	-5
Stumble	-1 to -3
One spiral not held for 3 seconds	-1 to -2
Both spirals not held for 3 seconds	-3 to -4
Poor quality of position(s)	-1 to -3
Poor quality of edge(s)	-1 to -3
Does not correspond to the music	-1 to -3
Loss of control while executing the sequence	-1 to -3

**GROUP JUVENILE NON-OVERHEAD JUVENILE LIFT**

The hold position in a Group Juvenile: Non-Overhead Juvenile Lift (JLi) may include any Group 3 or 4 hold. The Man's hand(s) must be at his chest or higher. If the Man's hand(s) do not reach and are not sustained for 1 revolution at his chest or higher, the lift will be considered as a dance lift and will not be called by the Technical Panel.

During the Group Juvenile: Non-Overhead Juvenile Lift, the Man must not have either elbow fully extended above his head at any point during the lift. Any Group Juvenile: Non-Overhead Juvenile Lift where one or both of the Man's elbows are deemed to be fully extended above his head at any point during the lift will receive No Value.

Partners may give each other assistance only through:

- hand-to-hand
- hand-to-arm
- hand-to-body
- hand to upper part of the leg (above the knee) grips

All Group Juvenile: Non-Overhead Juvenile Lifts will be called a Maximum Level base.

Changes of hold during the lift are not permitted.

Changes of the Lady's position during the lift are not permitted.

If changes of hold, or changes of the Lady's position occur and there is 1 revolution before and after the change, this lift will receive No Value.

**PIVOT FIGURE**

**Definition of a pivot figure:** in the final position while the Lady is performing the actual pivot figure, both the Man and the Lady must execute a minimum of one (1) revolution with the knees of the Man clearly bent and in full pivot position. The Man must be in a centered position with a fully extended arm. The Lady must attain a spiral position.

These positive features and reductions are extracted from ISU Communication No. 2186 with reference to Death Spirals. Since there are no Pivot Figures in international competitions, the list below has been edited slightly to match the Skate Canada program requirements.

<b>Guidelines for +GOEs: PIVOT FIGURE</b>
<b>For +1: 1 bullet / For +2: 2 bullets / For +3: 3 bullets / For + 4: 4 bullets / For + 5: 5 or more bullets</b>
FOR + 4 and +5 THE FIRST THREE bullets highlighted in bold must be present
<b>1) very good positions of both partners</b> <b>2) good flow and speed throughout (including entry and exit)</b> <b>3) effortless throughout</b> 4) good controlled transition into required positions and on exit 5) good/continuous edges demonstrated by man and lady 6) element matches the music

<b>Guidelines for establishing GOE reductions for errors: PIVOT FIGURE</b>	
Fall	-5
Wrong pivot position (losing toe pick etc)	-2 to -4
Poor position of the lady (definition of spiral position not achieved)	-1 to -3
Poor exit	-1 to -3
Slow or reduction of speed	-1 to -3
Weak lady's edge quality	-1

### CHOREOGRAPHIC SEQUENCE

A choreographic sequence consists of any kind of movements like steps, turns (except twizzles), spirals, arabesques, spread eagles, Ina Bauers, hydroblading, any jumps with maximum of 2 revolutions, spins, small lifts etc. Listed elements included in the Choreographic Sequence will not be called and will not occupy a box. The pattern is not restricted, but the sequence must be clearly visible. The Technical Panel identifies the choreographic sequence, which commences with the first skating movement and is concluded with the preparation to the next element (if the choreographic sequence is not the last element of the program).

### STEP SEQUENCE

**(For all categories where the Step Sequence is called no higher than Level Base - e.g. Juvenile Pair)**

A good Step Sequence will fully utilize the ice surface. However, in order to be identified as a Step Sequence, it must cover at least half of the ice surface.

Listed jumps may not be included. There is no specific pattern and short stops in accordance with the music are permitted. The Step Sequence should be executed according to the character of the music. Attention should be paid to energy and execution of the step sequence with an emphasis on the quality of steps, turns and body movements rather than difficulty and quantity.

Judges will reward Step Sequences that are matched to the musical structure and are effortless throughout

#### Skate Canada Defined Terms, definition of Fall

**A Fall** is defined as loss of control by a Skater with the result that the majority of his/her own body weight is on the ice supported by any other part of the body other than the blades e.g. hand(s), knee(s), back, buttock(s) or any part of the arm.
